

Puff Embroidery

Puff Embroidery is placing a layer of foam on the item being embroidered during the embroidery process. Only small parts of the design larger design have the puff under them.

As shown in the fireman's design &

Love Peace design.

Or an outline of a deer. As shown in the pink camo hat.

Or the design can only be 1 letter. As shown on the front "Wilcox Camp" hat. The back shows the full name of the camp.

Puff Embroidery is limited to items that don't need a lot of washings. Consider having puff embroidery done on a tote bag.
